GASTOPS

Making your Machinery more effective.

WE VIEW MACHINERY FROM A DIFFERENT PERSPECTIVE

Exceptional Turnaround Times

Our goal is to consistently deliver exceptional turnaround times on equipment repairs for our clients. Our extensive inventory of support spares and replacement parts supplement our reliable, high quality repair and overhaul services.

Licenses & Registration:

- FLIR Systems & Breeze Eastern licenses and TAAs for import & export of OEM parts
- Registered under Canadian Controlled Goods Registration Program

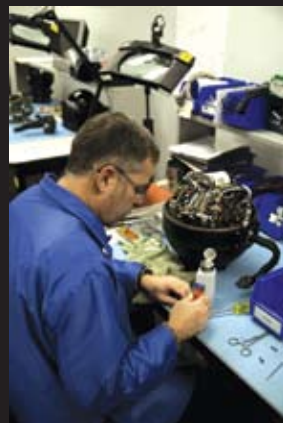

Certified under:

- ISO 9001:2008
- Transport Canada Aircraft Maintenance Organization (AMO)
- Canadian Department of National Defence Technical Air Worthiness (TAM) Regulations

Component MRO Services

GasTOPS offers component maintenance, repair and overhaul (MRO) services for a wide range of electro-mechanical, electro-optical, and electronic components used in both military & civilian aviation applications. Our 18,000 sq ft facility in Eastern Canada includes specialized tooling and test equipment for optical component adjustment and repair, and complete functional testing of hydraulic and electric rescue hoist systems. Our repair staff is OEM qualified and trained. The company's extensive engineering capabilities are also available to design, develop and qualify component modifications, upgrades and assist our customers with equipment obsolescence management.

Authorized OEM Repair

GasTOPS holds Repairable Material Account contracts with the Canadian Department of National Defence for both on-aircraft and ground support equipment and is the authorized repair center for:

- All FLIR Systems Inc airborne products including Model 2000, Star Safire and Ultra Series of Forward Looking Infrared Systems
- All Breeze Eastern Ltd airborne products including hydraulic and electric rescue hoist systems and cargo hooks
- Dynamic Instruments Vibration Analysers and Transducer Test Sets
- Pinpoint Laser Systems Microgage Precision Alignment Systems
- All GasTOPS Ltd products including FilterCHECK, ChipCHECK and MetalSCAN products
