

## Shut Down Sequence

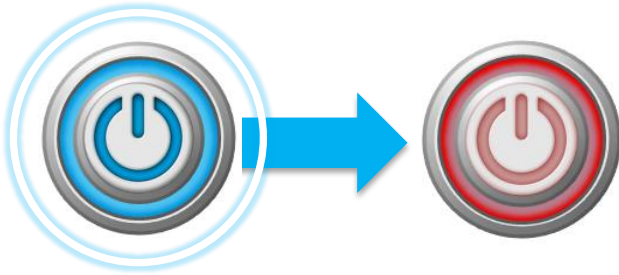

1. Power down the unit by pressing the Power Button on the front of the unit.

2. The Sample Receptacle will eject, and the unit will prompt to remove the Sample Tray. Remove the Sample Tray at this point (if desired).

3. Select "OK" on the screen. The Power Button flashes blue while the power down sequence is in process and turns solid red when it is complete.

4. Cut the main power to the unit by switching the Main Power Switch on the back of the unit to the OFF position.
